## **Renowned English Awards for German Premium Manufacturer of Prefabricated Houses**

Neunkirchen, Germany, November 2014

### **Stommel Haus of Germany shortlisted for renowned awards in the UK**

Stommel Haus, Premium Manufacturer of high quality timber houses produces energy efficient homes off site in Germany for more than 40 years. Recently the family business started to bring their bespoke product to the UK.

With the very first house built in the UK, Stommel Haus got nominated for the Green Footprint Award of North Leicestershire County Council and scored "Highly Commendable" in the category "Sustainable Urban Design". The owners of the house "Heather" were thrilled with the quality of the build, the adherence to schedule and to budget and most of all with the amazing energy efficiency and special atmosphere in their healthy home.

The third home built by Stommel in the UK, called „Silver Birch“, was shortlisted for the very renowned Build It Award for the category "Best Timber Frame House". In the shortest possible time frame, Stommel Haus helped to fulfil the dream of Connie and Drew Minton for a healthy, energy efficient family home in London. The owners lovingly call their house the "Trojan House" because of its Mock Tudor design on the outside and its high quality interiors and state-of-the-art building technology on the inside.

Barbara Fischer-Clark, agent for Stommel Haus in the UK, says: „The next Stommel houses in the UK are already in their finishing stages. The bespoke home for our clients in Surrey scored the best energy efficiency rating ever calculated by the independent energy assessors in London. We are very proud of this result. This week we started the assembly of a beautiful house in Yorkshire which will be finished in February. We are proud to play our part to serve the UK’s demand for high quality and contemporary bespoke homes in this fastest growing market in Europe.”

### **About Stommel Haus**

Stommel Haus GmbH is a premium manufacturer of energy efficient, solid timber houses. With more than 40 years of experience, the family business has proven that building with solid timber, energy efficiency, contemporary design and the attention to quality are no contradiction but lead to providing a modern, ecological and high quality product.

Nestled in the small town of Neunkirchen-Seelscheid near Cologne, Stommel Haus develops and produces their certified timber houses with high precision CNC machines. The houses are transported on site where they are erected by qualified teams and made wind and water tight typically within 5-7 days. The under-floor heating, heat pumps and the interior are then fitted by German craftsmen with only high quality branded products.

Since their foundation more than 75 years ago, the Stommel family embraced this wonderful material, building timber houses for more than 40 years with an emphasis on ecological and energy efficient building not only enforced by German building regulations but by the enthusiasm for the natural and healthy material wood used for the benefit of the wellbeing of home owners.
